SOFTWARE ENGINEER

As a passionate Computer Science student at MNS University of Agriculture, Multan, 🚀 my journey into tech began with programming. 📚 Focused on Software Development, I dive into agile methodologies, aiming for innovative solutions. 🌟 Pursuing my BS degree, I tackle academia challenges and explore realms of software and web development, broadening my skill set. Every line of code I write is a step toward making a meaningful impact.

SKILLS

- DSA(C/C++/Python/Java)
- DBMS
- Computer Network
- MERN Stack Development
- Operating Systems
- Teamwork
- Git & GitHub
- Linux
- Critical Thinking

PROFESSIONAL EXPERIENCE

Digistartup · Internship

Jan 2022 - Mar 2022

Web Developer

- Actively participating in various projects and initiatives for a duration of 3 months.
- Demonstrated proficiency in both front-end and back-end development, implementing solutions that enhanced website functionality and user experience.
- Collaborated effectively with cross-functional teams, showcasing adaptability and problem-solving skills in a dynamic startup environment.

PROJECTS

● Spotify Clone

Created a responsive music streaming app with user authentication, playlist features, and real-time audio playback using [React](#) and [Node.js](#). Integrated the Spotify Web API for seamless music data retrieval.

● Discord Clone

Real-time messaging app with [React](#), [Node.js](#), and [WebSocket](#). Features include user authentication, robust chat, and server management. Responsive design for an engaging user experience.

● Weather Web App

Built a Weather App with real-time data, featuring location-based forecasts and graphical representations. Demonstrated proficiency in [API integration](#), [data manipulation](#), and user-friendly interface design.
